

■ E3 Rocks Atlanta

The **Electronic Entertainment Expo (E3)** returns to the Georgia World Congress Center May 27–30 for another four days of loud, seizure-inducing exhibits and demonstrations. This year's show features new workshops and conference tracks for developers, analysts, resellers, and investors.

Admission to the show runs from \$45 for the exhibits to \$340 for a full conference pass. For more information, or to register, contact IDSA (Norwood, Mass.) at 800.315.1133 or via the Web at www.e3expo.com.

■ IEEE Relates to Consumers

The IEEE's annual **International Conference on Consumer Electronics (ICCE)** comes to Los Angeles June 2–4. The conference program highlights DVD, home networking, audio and video processing, and digital television. Tutorials are also scheduled that cover various aspects of audio, video, and wireless technologies.

For more information, contact IEEE (Rochester, N.Y.) at 802.872.2800, extension 15 or visit www.icce.org.

■ How Do You Program a Disk Drive?

That is the question. The answers are in *Programmer's Guide to SCSI*, a 300-page book/CD-ROM combination published by Addison-Wesley. The \$40 book by Brian Sawert covers SCSI

phases and fundamentals, technology and targets, terminators and troubleshooting.

The book (ISBN 0-201-18538-5) may be ordered directly from the publisher at www.awl.com/cseng/titles/0-201-18538-5.

■ Guide to Computer Law

And you thought computer documentation was dull. Commerce Clearinghouse is offering *Guide to Computer Law*, a large loose-leaf compendium in two volumes. Intended for software and hardware developers, Internet providers, and Web site developers, the *Guide* covers intellectual-property, patent, and trade issues, as well as semiconductor protection, regulations, and the text of pertinent laws. Monthly updates are included.

The single-copy price is \$520. For more information, or to order, contact CCH (Chicago) at 800.248.3248.

■ Semiconductor Consulting Coming Near You

Semiconductor Consulting Services (SCS), formed from ex-ICE analysts, is offering a series of traveling seminars in cities around the U.S. Covering topics such as memory technology, semiconductor-manufacturing economics, and IC fundamentals, the seminars are intended for engineers and executives.

Attendance costs \$495 per person for full-day seminars. For more information, contact SCS (Phoenix, Ariz.) at 602.569.8275 or via fax at 602.569.7637.

LAST CHANCE!

MAY 18 - 22, 1998

PC Tech Forum
Fairmont Hotel, San Jose, Calif.

As technical leaders, *Microprocessor Report* readers know advances in semiconductor technology drive the PC industry. As business leaders, you also know that a successful PC industry is more than just megahertz and bus speeds.

That's why we have made PC Tech Forum an event that puts PC technology advances in the context of market demands. In every presentation, you'll get the technical savvy you expect from *Microprocessor Report* coupled with the market savvy of analysts from across the industry.

PC Tech Forum is not a rehash of what you heard at WinHEC or the Intel Developer Forum; instead, it brings an independent cross-industry outlook on where the business is and where it should be headed. With panelists and presenters from all the top-tier PC makers, you'll get informed opinions and sound predictions. What you won't get is marketing hype or one-sided viewpoints.

PC Tech Forum is coming up in just a few days. Don't miss this chance to get a complete overview of the technologies and markets that will drive the PC industry.
