

## RESOURCES

### ❖ DSP/BIOS ONE-DAY WORKSHOP

Spend an interactive day with Texas Instruments and learn how to develop the key elements of real-time DSP systems, including scheduling, resource management, communications, and debugging. Workshops cost \$349.

For date, location, and registration, visit Texas Instruments' Web site ([www.ti.com](http://www.ti.com)) or call 1.800.477.8924.

### ❖ TAIWAN SEMICONDUCTOR DAY 2000

Learn about 12 of Taiwan's top semiconductor companies and the latest developments of the island's semiconductor industry. To be held at the Santa Clara Marriott Hotel by the Taiwan Trade Center on August 29. Call 415.788.4304.

### ❖ ANALOG/MIXED-SIGNAL APPS CONFERENCE

The Analog and Mixed-Signal Applications Conference provides an in-depth program of classes and tutorials for engineers and product designers working with communications, multimedia, and power-management applications. Technical sessions focus on the advanced use of amplifiers, data converters, voltage regulators, and complex signal

manipulators. To be held at the San Jose Hyatt Hotel on September 11–14. Call 415.278.5231.

### ❖ ADVANCED SEMI MANUFACTURING CONFERENCE

The 11th Annual IEEE/SEMI Advanced Semiconductor Manufacturing Conference and Workshop (ASMC) is for professionals involved in production control, process control, process transfer, yield and cycle-time improvement, cost reduction, preventive maintenance, line supervision, facilities fab operation, CIM, quality, training, and education. A panel discussion on Workforce Development and Challenges will be featured. To be held at the Fairmont Copley Plaza Hotel, Boston, on September 12–14. To register, call 877.746.7788 or 408.943.6901, or visit the SEMI site at [www.semi.org](http://www.semi.org).

### ❖ MICROPROCESSOR FORUM 2000

It's not too early to reserve a place at MDR's Microprocessor Forum 2000. More than 20 new microprocessors will be introduced at this year's Forum! See [www.mdronline.com](http://www.mdronline.com) for more details. ❖
